

Labour Supply - Procedure Development

Challenge

A client of 3sun Group required reviews to be completed of their current installation manuals and generate detailed workpack documents for their wind turbines.

Solution

- Prerequisites document
- Gap analysis of existing installation manuals
- HAZOP study
- Generate Offshore Workpacks in a format that has been proven in the field both on and offshore. This was incorporated with the installation procedures for the wind turbine
- PPE requirements document

Results

- Gap analysis of existing installation manuals highlighting key areas
- Completed documentation approved by client
- Successful onshore trial use of the Workpacks

Maximising Our Value

- Key areas for review highlighted to customer based on 3sun Group construction knowledge
- Successful use of the Workpacks during onshore trials and offshore construction
